

SUMMER / FALL 2018

URGENT SPECIALISTS

Your health is our speciality.

1 OF A KIND CARE

Unlike any other Urgent Care in the country, URGENT SPECIALISTS have Board Certified Physician Specialists available to assist in diagnosing, treating, and even performing procedures. Our Doctors have the best qualifications and decades of experience in the field of Ophthalmology (eye), Otolaryngology (ear, nose and throat) and Orthopedics (bones and muscle).

When it comes to healthcare, choices can be hard for patients. When people are feeling sick or are injured, patients have some options. These options include a visit to your Doctors office, an Urgent Care facility, Retail Health Clinic or Emergency Room. Patients have to consider the urgency of their ailments, medical coverage or their budget when deciding their options. URGENT SPECIALISTS provide patients not only with accuracy when it comes to their diagnoses, affordable healthcare but also shorter waiting times, which is typically not found in an emergency room setting.

US is staffed with professionals and licensed Nurse Practitioners that provide care for a greater range of conditions, including performing on-site X-rays. Our team are trained to accurately diagnose and treat patients.

Our services also include telehealth capabilities. This provides our patients the opportunity to connect with our Specialists via virtual delivery. "Our mission is to provide our patients with the best health care" says Dr. David Parry.

Our Board Certified Specialists keep abreast with the newest research and treatment in their specialty. So, when you or someone in your family needs medical care, you can trust our staff to provide you with the best medical expertise.

"This facility takes time to talk to me and hear my concerns. The staff are kind and detail oriented. I feel they care about my well-being." - Jaqueline D

Visit the US website to find articles to give patients insight in health matters relevant to YOU. These articles are written by US Doctors who have combined medical expertise and experience of over 100 years.
