

# DID YOU KNOW

## ARE ALL FLU SHOTS ALIKE?

No, not all flu shots are the same. Flu vaccines have a huge variance on how they are created and what they treat. There are currently approximately 8 flu shots to choose from in the USA. It is important to make an informed decision on selecting a flu shot as well as who will be administering the vaccine. The FLU is a serious health condition. Peak flu season in the United States is during the months of November until March. URGENT SPECIALISTS will provide you with the most advance flu vaccine available, with the widest protection against the flu by covering the 4 most common viruses.

**Dr. Robert Dean**

## WHAT IS THE DIFFERENCE BETWEEN URGENT SPECIALISTS AND THE ER?

Urgent care clinics tend to be less expensive than Emergency Room visits. In fact, the same care for the same condition can run three times as much or more in an ER compared to an Urgent Care facility. The wait time in an ER can be several hours, but an ER is equipped to treat more serious health conditions. Unlike any other Urgent Care in the country, URGENT SPECIALISTS provide you with access to Board Certified Specialists. URGENT SPECIALISTS provide patients not only with accuracy when it comes to their diagnoses, affordable healthcare but also shorter waiting times, which is typically not found in an emergency room setting.

**Patrick Erdely (Director of Operations)**

## WHAT IS NEW?

URGENT SPECIALISTS dispense medicines to patients upon being prescribed. This service provides patients with the convenience of eliminating a visit to the Pharmacy.

## WALK-IN OR APPOINTMENTS WELCOME

By calling US and making an advance appointment, US can insure shorting waiting time and more convenience for our valued patients.
